Monolithic Entry Statements

‘...Creating a lasting brand.’

Danthonia
DESIGNS

Your entry statements and branding signs are truly unique and not off-the-shelf items.

World Class

Danthonia designers and artisans consistently take top national and international signage awards.

Dimensional

Our monolith signage designs are fully three-dimensional, using shapes with carved, layered and sculpted components.

Versatile

Danthonia can build to custom shapes and dimensions without the limitations imposed by most metal or masonry structures.

Frangible

Our engineers design and supply frangible 'Road Authority Approved' solutions where close proximity to a main road is required.

Digital

Danthonia offers LED messaging options for safe, easy and effective event communication and marketing.

Factory Made

Danthonia projects are completed on schedule with factory precision regardless of weather conditions at your site.

Fully Assembled

All units are fully assembled, tested, photographed and client-approved prior to shipment.

Delivered in one piece

Monolith signage up to 13 metres long will arrive on a crane truck, with all components in place. Units are delivered in one piece ready to attach to a pre-poured foundation.

Night Readable

Your order can include retro-reflective text or solar or mains powered LED flood lighting. Danthonia handles the entire project from concept through installation including lighting.

Your deadlines are met and your personal time is not wasted on complex project management.

Watch the hammer test!

Climate Resistant

Our closed-cell foam units are designed to contract and expand without cracking during extreme or repeated temperature swings. Monolithic designs will not crack or crumble should foundations heave or settle over time.

Weather Resistant

Danthonia's waterproof materials and seamless finishes withstand driving rain and flood waters. Internal aluminium post systems are engineered to withstand a 100-year wind event.

UV Resistant

Our Dulux Weathershield paints have a 15-year guarantee against blistering or peeling. Mineral pigments assure that most colours show no significant fading for over 10-12 years.

Vandal Resistant

Danthonia's new hammer-proof finish and optional, easy to clean anti-graffiti coatings withstand significant impact, marker and spray paint attacks.

Your branding and signage investments bring a longer lasting return.

What awards has Danthonia taken?

A partial listing of recent awards include:

Signs of the Times (International)

1st, 2nd, 3rd place - Commercial Freestanding Signs (2011)

1st, 2nd, 3rd place - Commercial Pylon Signs (2009)

1st, 2nd, 3rd place - Carving & Sculpture (2008)

1st, 2nd, 3rd place - Carving & Sculpture (2006)

Does Danthonia do much work for local governments?

About 40% of Danthonia's work load is commissioned by local government. Since 2001 we have designed, fabricated and installed signs and signage systems for over 80 local governments in NSW, QLD, VIC, SA, and WA.

Is Danthonia a LOCAL BUY supplier?

Yes. Originally selected in March 2009 and re-chosen in 2011 Danthonia is currently recognised as a pre-qualified LOCAL BUY supplier to government authorities in Queensland, South Australia and Northern Territory. Our Contract number is BUS-201 0810.

What are Danthonia monolithic signs made of?

An engineered structure of aluminium posts and braces is enveloped in closed-cell EPS foam. The foam is custom shaped and coated with a 4mm 'hammer proof' flexible finish. The monolith is painted using Dulux Weathershield paints and stucco finishes. Three dimensional HDU text elements and signage components are added as design requires.

Are Danthonia signs frangible ?

Danthonia's engineers have designed and supplied frangible signs that have met the approval of MAIN ROADS-QLD, MAIN ROADS-WA, DOT-SA and VIC ROADS.

What about vandalism ?

Danthonia's new hammer-proof finish and optional, easy-to-clean 'Graffiti Buster 200' coating can withstand significant impact, marker and spray paint attacks. Ask for a 'HAMMER TEST SAMPLE'. We will send you a sample piece of our unique 'monolith' material - see if you can smash it!

I'm ready!

What's my next step?
